Elite Roofing Lands Work at Ft. Campbell

Elite Roofing of Nashville is excited to announce a new project consisting of work at Fort Campbell KY/TN Army Installation. The project will be a re-roofing project for nine different buildings spread throughout the facility.

D'Arcy Porter, President of Elite Roofing, commented "It feels good to have such a great project in our own backyard. Fort Campbell is a great opportunity for our company due to the project size and its convenient location to Nashville."

The acquisition of this project is a step in the right direction for Elite Roofing. Over the past year Elite has quoted several projects with several different general contractors who are established on the post. Vice President Glenn Conway explained, "We see this project as an opportunity. It's an opportunity to show everyone at Ft. Campbell the type of work our company is capable of performing."

238910 (Site Prep)
238320 (Painting)

Millington Naval Base Update

Check out the Latest Updates from Our Progress

The work in Millington is underway. Elite Roofing is excited to announce that all three projects at the U.S. Naval Base in Millington, TN are moving along.

The first project which is under way is the re-roofing of Building 768 (pictured to the right). This project consists of re-roofing ballast laid roof that is 50,000 square feet. This week the project should work closer towards completion as the crews have had great weather this week.

Building 768, Millington Naval Base, Millington, TN

The next project that is underway is the project at the LCC Facility located on President's Island in Memphis, TN. The facility is a very difficult project due to the many safety concerns. The structure requires the replacement of metal panels onto a building that reaches 125 feet in height. Our crews began prepping safety work for the facility in late September.

Elite Roofing will begin mobilizing next week on its third project for the Navy. The project is a complete re-roof consisting of an HVAC salvage and removal. This project was a sole source award earned by Elite Roofing. The work on this project will go a long way to show Elite Roofing's capabilities.

Safety is a priority on ALL of our projects.

Shoreline Power Project Starts In Guntersville

One of the key components to growth and success is diversity. After making a reputable name in the roofing industry with over eighteen years of service Elite Roofing has decided to expand our capabilities. The Shoreline Power Project allows our company to take advantage of our capabilities to work under NAICS code 238210.

The project will consist of work at six different sites including four stops in Tennessee, one in Kentucky, and the very first project to take place in Alabama.

The first of the six projects will begin in Guntersville, Alabama along the Tennessee River. The project will start in early October.

Projects will follow along the Tennessee River at Chickamauga Dam, Nickajack Dam, Fort Loudon, Watts Bar, and Kentucky Lock.

Elite is About More than Just Roofing

Operating for over eighteen years with great success in roofing has been the staple for Elite Roofing of Nashville. The continued show of excellence in construction and the overall quality of the business has led to a tremendous amount of growth.

As the economy began to have a downward impact on small business D'Arcy Porter, President of Elite Roofing, decided it was time to take advantage of his company's diverse abilities. The ability to serve as a General Contractor has given Elite Roofing the ability to branch out from the roofing only field. Through this progression into other capabilities and markets the company has begun to see growth and project success.

The ability for Elite Roofing to not only put on the roofing system, but also provide services such as electrical construction, siding, drywall/insulation, site prep, painting, and general construction.

These diversified capabilities have helped Elite Roofing expand during the current economic recession. Director of Marketing Chris Layton commented, "We want to promote our company as more than just roofing. It allows us to search for more and different clients and projects. It also gives us an opportunity to grow and work where the market presents itself."
