

EXTERIOR BUILDING PRODUCTS

Royal Building Products

Great Ideas Taking Shape.

Colorsapes Premium Vinyl Siding is a revolutionary new product offering industry-leading UV resistance and fade protection.

Royal DuraPlank Reinforced Siding offers the look and feel of real wood, the impact resistance of fiber cement as well as the installation ease and maintenance-free qualities of vinyl siding.

Royal Designer Shake's deeply molded woodgrain texture and low-gloss finish beautifully replicate the look of real cedar shake.

Royal Building Products – Everything You Need to Protect and Beautify Home Exteriors

Royal Building Products has set the standard in vinyl building products for over 30 years, offering a wide variety of exterior cladding and accessories for the new construction and remodeling markets, all backed by the most powerful warranties in the business.

We are one of North America's largest manufacturers of vinyl building products, and our strength comes from the fact that we design and build our own manufacturing equipment, and refine and blend most raw materials. By investing heavily in high-tech research and development, we've created our advanced Royalside™ Compound and Dura Technology™ Process, which enable our products to deliver superior appearance and durability. Plus, we hold a large number of patented manufacturing processes.

We also have the unique distinction of investing equal amounts of energy into marketing research, which provides us with a better understanding of which colors, textures and designs are most appealing to consumers' ever-changing tastes. With Royal, professional contractors, builders and remodelers across North America can easily find the exterior building products they need to get the job done – whatever the size or budget.

Vinyl Siding, Soffit & Accessories

Over 200 patented processes along with our Royalside™ Compound and Dura Technology™ Process provide superior color retention, impact resistance and long-lasting protection. Available in a wide variety of profiles, gauges and colors.

Royal Designer Shake

The classic look of cedar without the high cost or constant upkeep. Features extra-thick construction, built-in ribs and a perimeter locking system for exceptional strength, rigidity and an

enhanced solid wood look. Available in Hand Split, Rough Sawn and Half Round profiles.

Railings & Columns

Traditional Square or Colonial style columns mount easily onto almost any surface and are certified for 5,000-lb. of load-bearing strength. Easy to assemble railings are ICC approved for all U.S. building applications.

Royal Premium Shutters

With their solid wood look, wide color selection and incomparable performance, Royal Premium Shutters provide the perfect decorative accent. Plus, their true 15" width provides full coverage over lines when replacing old wood shutters.

Mounts & Vents

Wide selection of versatile and virtually maintenance-free products that lead the market in design, performance and durability. Easy to install and maintain, they're the industry's best Mounts & Vents.

Exterior Trims and Moldings

We offer the broadest choices of 100% Cellular Vinyl PVC™ and polymer products in the building industry. We manufacture products that provide an upgrade in appearance, value and curb appeal to remodeling, replacement and new construction markets.

Member of Royal Group

Royal Group is a Georgia Gulf company. Georgia Gulf Corporation is a leading, integrated North American manufacturer of commodity chemicals, polymers and vinyl-based building and home improvement products. The Company's chemical and polymer product lines include chlorovinyls and aromatics. Georgia Gulf's vinyl-based building and home improvement products, marketed under Royal Group's brands, include window profiles, siding, pipe and fittings, moldings, decking, fencing, railing and window coverings. Georgia Gulf, headquartered in Atlanta, Georgia, has nearly 50 manufacturing facilities in North America to provide industry-leading service to customers.
